PROFESSIONAL EXPERIENCE

2025 – Jul to Nov — **GENERALI – Data & IT Transformation Intern**

Insurance company

- Built Power BI performance reports from extracted and transformed data for operational monitoring. (*Power BI*)
- Automated 15+ internal workflows with Power Automate and Power Apps, improving KPI traceability and reducing manual follow-up time
- Implemented tools (applications, AI agents) to enhance project performance and agility
- Automated internal processes within the Tech & Ops division

2024–2025 — **Albert School Junior Consulting – Treasurer & Project Manager**

Junior company specialized in AI, Data and Consulting

- Managed project coordination and internal operations for Albert School's junior consulting structure (+40 students)
- Supported commercial development and proposal building for AI/Data consulting missions (x4 turnover over the year)
- Oversaw treasury, budgeting, and financial follow-up
- Contributed to client discussions and deal closing

2024 – Jun to Aug — **Starget Holographic – Chief of Staff Intern**

- Automated internal processes and launched prospecting campaigns
- Developed a customer-facing chatbot and implemented a company newsletter

2024 – Feb to Apr — **M1 Partners – Consulting Project**

Creation of a Startup Database for Villa Blu Business Accelerator

- Sourced and scraped data to build a qualified startup database of 100+ companies for Villa Blu Business Accelerator

BUSINESS DEEP DIVES

Three-week sequences during which we work with a company to address a given problem using the provided data, as well as our knowledge and personal research.

LVMH (Louis Vuitton) : *Proposed a strategy to boost the South Korean market for Louis Vuitton products.*

SNCF : *Analyzed the correlation between weather conditions and railway incident frequency; predicted daily defects using machine learning.*

CMA CGM : *Defined optimal maritime routes to minimize costs and environmental impact using optimization algorithms.*

Ministère des Armées : *Created an AI capable of detecting AI-generated text with 98% accuracy.*

Generali : *Analyzed a 15,000-row dataset to visualize IT practices, identify inconsistencies, and propose concrete optimizations.*
